HOBBIES AND INTERESTS

I turned my hobby into my profession, luckily I have more than just one hobby. I love to create in the most versatile way of speaking. Clothes, accessories, furniture, decoration or refurbishing old objects. I see beauty in many things and I love working with all sorts of different materials. Besides creating things of my own, I also love other people's creations. Especially historical art and architecture, I find the precision very beautiful and fascinating. Instead of just looking, I also love to listen. I'm a big fan of various genres of music,

but I mostly like the more alternative and experimental ones. I love to share this passion for music with other people during concerts, festivals or dance parties. To relax from all these fun activities, I like to watch movies and TV series. Fiction really is my 'cup of tea'. Also non-fiction like documentaries about flora, fauna and mother earth interest me a lot. Therefore, I love to travel and watch all those amazing things up close and personal. Scuba diving, tramping, cycling and riding around are my favorite activities while traveling.
